

## Tube feeder for milk powder

Product group: Tubular feeder

Industrial process: Discharging, feeding, conveying

Industry: Food, Animal Feed

Type of drive: magnetic vibrator

capacity (t/h): 0,1 | bulk: milk powder | density (t/m<sup>3</sup>): 0,25 | grain size (mm): unter 1  
function:

discharge of milk powder after bunker with bucket wheel and dosing with high capacity of 40 m<sup>3</sup>/h (grain size - 1mm, 0,25 t/m<sup>3</sup> bulk density).

solution:

Tube feeder with a length of 4630mm and a width of 406mm, driven by a magnetic vibrator with a frequency of 33Hz (MVH33). With surface roughness of 0,2-0,3 µm, continuous welding, keel hermetic closed and welded to the tube, special tube covers.

usability:

- Staubdichtes System
- Vorteile der MV-Technik
- Einfache Reinigung durch Spezialdeckel

place of installation: Netherlands
