

Storage and conveying device for catalyst parts

Product group: Trough conveyor

Industrial process: sorting, dosing, storing

Industry: Chemicals, Plastics, Pharmaceuticals

Type of drive: Unbalance motor

capacity (t/h): 0,450 | bulk: Catalyst parts | density (t/m³): Stück | grain size (mm): 10
function:

450 kg / h catalyst parts comes from a closed pipe system connected with compensators. The vibrating trough conveyor in an enclosed design served as a buffer.

solution:

Vibrating Conveyor trough in dustproof special design according image. Execution of stainless steel with flange.

usability:

Storage and conveying in one device. Space and cost saving.

place of installation: Germany
