

Hopper Vibrator for coal trains

Product group: Bin activator

Industrial process: compacting, loosening

Industry: Construction, Quarries, Pits, Mining, Cement

Type of drive: magnetic vibrator

capacity (t/h): - | bulk: Coal | density (t/m³): 0,64 | grain size (mm): 50

function:

Magnetic vibrator type MVE50-4 c/w mechanical system for contact with wagon. Vibration discharge aid for unloading of coal wagon.

solution:

The vibrator will be pressed by means of mechanical system to the wagon. Under vibration the wagon will be unloaded and cleaned from rest of coal.

usability:

Improved unloading of wagon and therefore optimised discharge process.

place of installation: Russland
